

*Roemmich
Guitars*

Inspired by the famous Spanish luthiers we have been making classical guitars for over 30 years. We also make historical copies of Romantic guitars based on Panormo, Lacote, Staufer etc. Due to our superior building skills our instruments faithfully reflect the characteristics of the Spanish school of guitar making with a beautiful, distinguished and long sustaining tone.

Our carefully selected mature woods are a major contributing factor in the quality of the construction of our instruments.

The soundboards are of either Canadian cedar, or spruce from the German, Austrian, and Swiss Alps as well as from Bosnia. For the sides and back only the best rosewood is used.

The necks are of Hondurian cedar and Swietenia mahagoni; and the fingerboards are ebony. Only natural glues such as fish and hide-glues are employed and all our guitars are French polished.

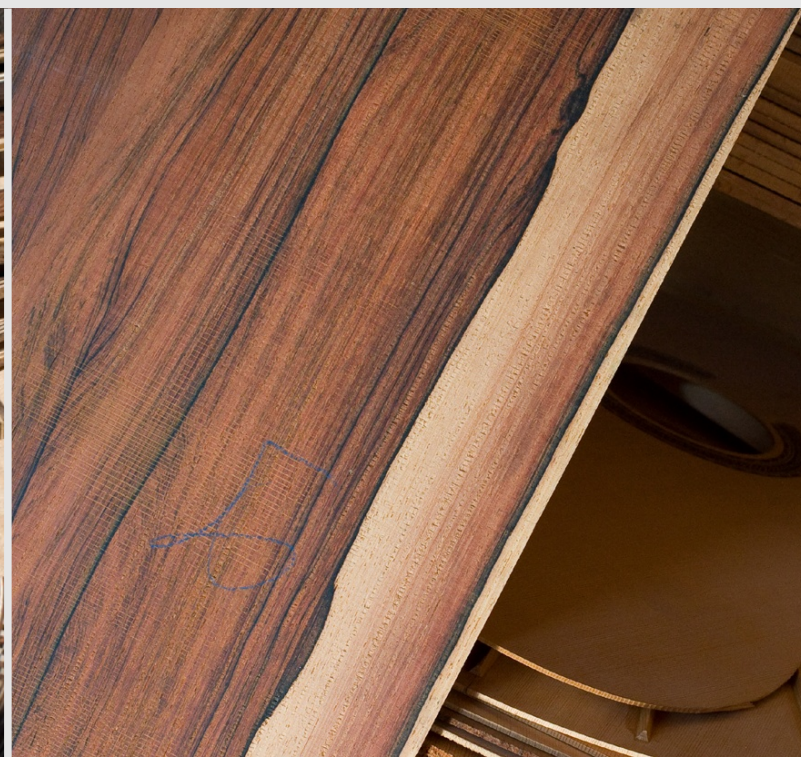

Our instruments can be heard on countless recordings.

In 2008 world stars such as Xuefei Yang and Roman Viazovski ordered guitars from us.

For further information please contact us.
